General Civil Aviation Authority (GCAA) CAR Part IV - UAS Regulations

United Arab Emirates Official Regulatory Gazette

CAR.UAS.405 - Tactical Separation Minima for BVLOS Operations

Unmanned aircraft operating in BVLOS corridors must maintain a minimum tactical separation of 500 feet (152m) vertically and 1,000 meters laterally from non-cooperative aircraft, and 200 feet vertically within coordinated UTM corridors. Immediate climb or heading offset is required upon lateral proximity violation.

CAR.UAS.410 - Contingency and Emergency Deconfliction Procedures

In the event of a conflicting trajectory between cooperative unmanned aircraft, the lower-altitude aircraft shall yield right-of-way or descend to terminal floor unless overriding safety risks are declared by the UTM coordination authority.
