UAE Federal Decree-Law No. 26 (2020) On Civil Aviation

United Arab Emirates Official Regulatory Gazette

Article 14 - Priority and Right-of-Way in Sovereign Airspace

Manned aircraft, emergency medical transport (HEMS), search and rescue, and state flights possess absolute right-of-way over all unmanned aerial systems (UAS). UAS operating within controlled airspace must immediately yield corridor clearance and execute descending or holding evacuation upon notice of emergency traffic.

Article 19 - Autonomous Flight Authorisation and Geo-Fencing

No unmanned aircraft shall operate beyond visual line of sight (BVLOS) without real-time coordination with the designated UTM system. Geo-fencing buffers around airports and vital national infrastructure must be maintained at a minimum distance of 500 meters at all times.
